1. Overview

Prep Coin™ (PREP) is a Solana-based utility token launched in January 2025 from Swansea, UK, designed to unite preppers globally by bridging blockchain technology and prepping culture. The project empowers users with access to workshops, gear, and community resources, fostering a resilient network through education and practical tools.

The mission of Prep Coin™ is to build a robust prepper community leveraging the fast, low-cost Solana blockchain. Key features include:

- Audited smart contracts for PREP and Prep-STK, completed April 30, 2025, by Cyberscope.

- No-KYC policy to ensure privacy.

- Active Prep Coin™ Community Facebook group.

Currently in pre-launch, the private sale is ongoing, with the presale starting May 8, 2025. The website, prepcoin.xyz, will launch on May 8, 2025, hosting audit reports and the full whitepaper PDF. The project is restricted to users aged 18+ or with guardian consent and is geolocked to the UK.
